OBJECTIVE

Final-year BCA student with hands-on experience in Java backend development, MySQL databases, and Linux fundamentals. Seeking an entry-level opportunity in the IT sector where I can contribute as a junior backend developer, strengthen my real-world development skills, and grow toward an MCA and a long-term career in software development.

EDUCATIONAL DETAILS

Bachelor of Computer Applications (BCA)   2023
Solapur University- Final Year
Present

HSC, *Pune Board*   2021
75%

SSC, *Pune Board*   2019
65%

TECHNICAL SKILLS

Programming & Backend
- Java (Core Java, Java HttpServer)
- Backend logic development
- Basic REST-style API handling

Web Technologies
- HTML
- CSS

Databases
- MySQL
- Basic SQL (CRUD operations, table design)

Operating System
- Windows
- Linux (commands, file system, permissions, shell basics)

Languages known

- English
- Hindi
- Marathi

PROFESSIONAL SUMMERY

- Final-year BCA student with a strong interest in backend development and system-level technologies
- Practical experience building Java-based backend applications with database integration
- Working knowledge of Linux operating system fundamentals and command-line usage
- Basic understanding of computer networks and web technologies
- Quick learner with a strong sense of responsibility and commitment to building a career in IT

KEY RESPONSIBILITIES HANDLED

Responsible for understanding project requirements and the complete application flow before starting development. Worked on designing and implementing backend logic using Java HttpServer and MySQL, including basic database operations such as creating tables and performing CRUD operations. Actively integrated frontend pages developed using HTML and CSS with backend APIs to ensure smooth data exchange. Gained hands-on experience working in both Linux and Windows environments, using command-line tools for execution, debugging, and testing. Maintained project structure, managed database connectivity, and ensured proper functioning of the application through regular testing and issue resolution.

PROJECT SUMMARY:

Project Name: Weather Application
Weather Application
Role: Backend Developer
Technologies: Java, Java HttpServer, HTML, CSS, MySQL
Description: Developed a web-based Weather Application using Java HttpServer without using JSP or Servlets. The application includes backend logic, database integration, and a frontend interface built using HTML and CSS. Weather-related data is stored and managed in a MySQL database.
Key Contributions:

- Designed and implemented backend logic using Java HttpServer
- Created and managed MySQL database and tables
- Implemented CRUD operations for data handling
- Integrated frontend pages with backend APIs
- Debugged and tested application functionality
- Executed and managed the complete project using command-line tools

PERSONAL INFORMATION:-

- **Full Name:** Prashant Irappa Bhanage
- **Current Location:** Maharashtra, India
- **Languages Known:** English, Hindi, Marathi
